What Does DoC Membership Offer?
   There are charts full of information about legislators—general information, email, Facebook, health issues staff names and contact information, committee lists.
2. Aids for writing: Example letters, Facebook posts, twitter posts
3. Summarizations of the Bills before Congress and DoC’s position. So you can easily communicate your position with your congressman so they vote correctly or get fired.
4. Videos: DVDs are available for purchase in the store, but there is also a shortened form of many of the DVDs available on the videos page. These include:
   - Illegal Use of the Law Against Doctors
   - Interviews of Doctors attacked.
   - The REAL Cause of Drug Abuse
   - Fibromyalgia
   - The Seven Steps to Healing
   - Homeopathy
5. Members Forum
6. Latest news reports on what is happening nationwide.
7. Activities for people to take part in. nationwide.

Besides doctors, other Innocent victims of the War On Doctors: The Pain Patient.

“Pain is a more terrible lord of mankind than even death himself.” Albert Schweitzer

Legitimate pain patients are now being forced to the street for self-medication, leading to suicide, both unintentional and intentional. Added stress increases risk for addiction.

Doctors targeted—minority, independent, taking care of the expendable populations above.

The Department of Justice has gone rogue. They are creating crime where there is no crime and the naïve public is buying it! Doc will inform you of the TRUTH and enable you to fight the government propaganda.

The Controlled Substances Act (CSA) was signed into law by Richard Nixon on October 27, 1970, replacing older statutes pertaining to illegal drugs. But the reasons for the law remain the same. Only the targets have changed—from drug cartels… to doctors.

The National Drug Interdiction Improvement Act of 1986 shows that Congress’s purpose in the law was to stem the illegal drug smuggling and trafficking in the country. No reference to doctors AT ALL.

The DEA is supposed to govern the ILLEGAL trafficking of drugs into the US. They failed. So they turned on doctors. “Go to where the money is, and the guns aren’t.”

802(56)(c) of the CSA states “THE PRACTITIONER, acting in the usual course of professional practice, DETERMINES there is a legitimate medical purpose for the issuance of the new prescription.”—NOT THE DEA AGENT OR THE US ATTORNEY.

US Attorneys and DEA agents with barely more than a high school education are now stating (without any proof) that the doctor’s medical decision-making is not “legitimate medical practice”. But when asked on the witness stand, as in the trial of Dr. John Patrick Couch in Mobile, AL, to delineate what is “legitimate medical practice” in pain management, the DEA agent said he couldn’t answer that question because “he wasn’t a doctor.” BINGO!!! ONLY THE DOCTOR CAN DETERMINE WHAT IS LEGITIMATE.

Supreme Court decisions have stressed that the CSA is not applicable to doctors. In Gonzales v. Oregon: “The statute and our case law amply support the conclusion that Congress regulates medical practice insofar as it bars doctors from using their prescription-writing powers as a means to engage in illicit drug dealing and trafficking as conventionally understood. Beyond this, however, the statute manifests no intent to regulate the practice of medicine…”

The government is using Hitler-era tactics to cover their jobs and bring in money.

Make the lie big, make it simple, keep saying it, and eventually they will believe it.

Blame doctors for the fake “opioid epidemic”?

1. There is no “epidemic”. 1% of the population is addicted—same as in the 1800’s.
2. Drugs are NOT the cause of abuse or addiction.
3. Opioids have been falsely blamed for addiction purely for political reasons for the last 100 years.

Drug abuse is a lifestyle problem, caused by toxicity, anxiety, and despair. On Doc, you can learn how lifestyle causes addiction, and how it can be cured.

Innocent people are being incarcerated for political gain. We need to decriminalize all drugs and…
